SUMMARY

As a Full Stack Web Developer, I am passionate about creating functional, responsive web applications that provide an exceptional user experience. With in-depth expertise in the Laravel framework for the backend and Vue.js for the frontend, I am capable of handling the entire digital product development lifecycle. I am always seeking new challenges to continue growing and contributing to a solid team. If you are looking for a dedicated developer, please feel free to contact me.

EXPERIENCE

Full-Stack Web Developer (Internship)

PT Cipta Krida Bahari (CKB Group)

June 2025 - September 2025, Jakarta, Indonesia

- Developed the "First Aid Kit Consumption" module using Laravel and Vue.js, enabling each branch of PT Cipta Krida Bahari to efficiently record and track the usage of first aid kits.
- Developed the "Genset Inspection" module using Laravel and Vue.js, enabling systematic inspections to ensure operational readiness and proper maintenance tracking of generators across branches.
- Developed the "First Aid Kit Inspection" module using Laravel and Vue.js, facilitating monthly inspections to monitor how many first aid kits have been used and the remaining stock in each branch.
- Developed the "Hydrant Pipe Inspection" module using Laravel and Vue.js, supporting regular inspections to ensure fire safety compliance and accurate monitoring of hydrant conditions across branches.

Back-End Web Developer (Internship)

PT Telkom Satelit Indonesia (Telkomsat)

July 2024 - November 2024, Bogor, Indonesia

- Participated in the development of the Inventory Management System website's workshop module, which is used to record and manage the results of production equipment testing.
- Successfully designed, developed, and implemented 16 REST APIs to support system integration during two months
- Collaborated with team members to ensure API functionality aligned with user requirements and project goals.
- Ensured APIs met performance and reliability standards by conducting thorough testing and debugging.
